

AOSIS Climate Change Fellowship Program

A major challenge for AOSIS members in the UNFCCC process is finding the resources necessary to allow for representatives to engage in substantive training focused on the complex climate negotiations. This reality puts AOSIS at a disadvantage in the negotiations, and prevents valuable experience from being transferred from the international arena to domestic government work, and vice versa.

To build lasting capacity in AOSIS, and in member governments, the AOSIS Climate Change Fellowship Program was established. Fellows receive comprehensive training in climate change issues, and it is expected that they will return to their home country and continue to engage on these issues and in the UNFCCC process.

Each fellow will receive:

- A roundtrip economy airfare ticket (up to \$3,000) to New York City;
- A fixed settling-in allowance of \$2,000;
- A laptop computer and cell phone for use while an AOSIS fellow;
- A monthly stipend of \$4,000 USD per month (housing costs are to be covered by the stipend);
- A travel budget to cover the costs of attending major UNFCCC meetings;
- Training on relevant issues of law, policy, and science to build fundamental knowledge and understanding of climate change;
- Media training to learn the skills necessary to carry information beyond policy-making circles to a broader international audience;
- Real-world negotiation experience at the United Nations to bring back to governments in their countries of origin; and
- Opportunities to participate in important international climate change conferences.

Appendix – Terms

This appendix includes fellowship terms, minimum qualification requirements for candidates, preferred qualifications, and the obligations of the sponsoring Mission.

Fellowship Terms

Fellows agree to:

- Spend 80 per cent of their time (4 days per week) on AOSIS Fellowship work;
- Report to the AOSIS Fellowship Coordinator for instructions and assignments on AOSIS priorities;
- Attend all Fellowship meetings and trainings in New York; and
- Attend and actively participate in UNFCCC meetings, including covering priority areas for AOSIS as assigned by the Fellowship Coordinator.

Candidate Requirements

The candidate must:

- Be a national of an AOSIS country;
- Be age 25 to 35;
- Hold a degree in a relevant field (environment, climate change, international relations, law, sustainable development, fisheries, oceans, finance, etc.);
- Demonstrate discretion and sound judgment in dealing with politically sensitive issues in a diplomatic environment; and
- Be proficient in English.

Preferred Qualifications

Preferred candidates should:

- Have a desire to work in the national government following the completion of the Fellowship Program;
- Demonstrate excellent academic record and writing skills; and
- Have 1-3 years of experience working in national government (maximum 5 years); or
- Have 1-3 years of experience in a regional or international organization (maximum 5 years).

Sponsoring Mission Requirements

Sponsoring Missions will be responsible for:

- Accreditation of the fellow to their Mission and to their National UNFCCC delegation;
- Securing a US visa for the fellow; and
- Providing a suitable workspace in their respective Mission.

The 2017 AOSIS Climate Change Fellowship Program is supported by the Government of Italy.
